Creating New Leaders

"The walk back to the starting point was really hard. I could barely breathe and my legs were tired. However, I kept going because I was inspired by my tour guide and Fatima was right by my side encouraging me to keep going. The volcano represents the things we had to go through like fundraising and learning about different ecosystems. On this trip, I learned that I could manifest greatness because I didn't let anything stop me."

-CaRosa Johnson, Chapter 5

"On the second plane ride, I was confident as ever and I couldn't stop smiling because I overcame my fear of heights and it was important because it was holding me back from traveling to Costa Rica. This project has taught me that things aren't as scary as you think they are, you just have to be brave and experience them for yourself."

-Fatima Ndon, Chapter 5

"This project has raised my confidence and shown me that my translating ability could be used to advance my future career. I manifested greatness by helping people with their problems and needs they might have."

-Angel Mariscal, Chapter 5
